

## Transforming Data Into Evidence

### Finding the Critical Information

Sooner or later almost every business is faced with producing electronic evidence to comply with court mandates or regulatory requests. Vestige's professional electronic discovery consultants analyze terabytes of data — to uncover the most relevant evidence. Our processes, which include data analytics, data visualization, deduplication, keyword searching, predictive coding and hosting on our SOC-2 certified secure data center, follow the Sedona Conference standards to ensure quality in areas such as document tracking and exceptional reporting, making the E-Discovery process and decisions transparent and defensible in court.

If you understand the value of leveraging the use of technology over manual review and have at least 600,000 documents, Vestige E-Discovery is for you!

*Vestige can quickly seek, locate, secure and search through large volumes of Electronically Stored Information (ESI) to find the critical data you need to utilize as evidence in civil and criminal courts of law.*

### Trusted Services & Staff

Choose from one of our three services: **Defensible Preservation, Defensible Search, or the comprehensive OnePass<sup>SM</sup> Controlled Discovery.**

Vestige's technical Electronic Discovery staff includes certified analysts and administrators who can handle any technical challenge that might arise. Our team addresses very complex E-Discovery issues, from the preparation of forensic and E-Discovery protocols to matters involving sophisticated search and retrieval methodologies, Rule 26(f) requirements, Special Master/Neutral Experts, and more.

### Our E-Discovery Benefits

- Vestige designs, implements and take **responsibility** for all aspects of the Electronic Discovery Reference Model (EDRM)
- Plan & **Manage** the Project
- **Identify** Relevant Data Sources
- **Preserve** Electronic Evidence
- Process & Search **Large Volumes** of Data
- Create a Searchable Database of all discoverable information from all technology sources simultaneously and **without disruption** to your client or personnel
- Accommodate Aggressive Deadlines
- Minimize Cost

### Vestige Difference

Our process is what sets us apart:

#### Speed

Speedy access to critical information, earlier in the process

#### Control

Improves attorney control to identify, preserve, analyze, produce & review ESI

#### Insulation

Insulates client's IT, business processes and confidential data from adversarial discovery process

#### Cost

Decreased total overall cost of preparing and responding to managing ESI as evidence

### ESI Solutions

- Project planning & execution
- On-site preservation of ESI
- Data culling, filtering, analysis
- Metadata analysis & reporting
- Key term searching and reporting
- Data content analysis & reporting
- Technology infrastructure analysis
- Document deduplication
- Data processing (native or fixed image) and metadata extraction
- Creation of load files for litigation support software
- eDiscovery Special Master Services
- Social Media discovery
- Software-as-a-Service (SaaS)
- Solutions for complex litigation, Hart Scott Rodino (HSR) Second Requests, and regulatory investigations.

OVER

# Vestige E-Discovery Services

## Defensible Preservation Plan

### Helps Eliminate Dilemmas

Vestige's Defensible Preservation Plan keeps the attorney and the client out of trouble because it expertly identifies and defines the relevant electronic evidence and simultaneously preserves and collects that evidence in a manner that isn't typically challenged as it exceeds today's standards in use by most parties involved in litigation.

This is a collaborative process between Vestige's Digital Experts, the client's legal team, the client's Information Technology Department, and the custodians. Vestige takes control and responsibility for properly identifying, preserving, collecting, and documenting not only what evidence ought to be preserved, but also the facts that support those decisions. Clients that engage Vestige to perform a Defensible Preservation Plan avoid challenges to the efficacy of their identification and preservation of digital evidence.

## Defensible Search

### Utilizes Technology to Efficiently Respond to Discovery

Defensible Search Plan is geared specifically for the Producing Party in those situations when they are not focusing on building their case or fact find, but instead are simply interested in responding in the most cost effective and expedient manner.

It combines legal, statistics, linguistics and technical capabilities from your Vestige Digital Electronic Experts. Case law does not mandate that Discovery be perfect, but must be DEFENSIBLE.

The Vestige Defensible Search provides the solution you're looking for.

## OnePass<sup>SM</sup> Controlled Discovery

### Comprehensive E-Discovery Solution

OnePass<sup>SM</sup> Controlled Discovery encompasses the entire EDRM. It allows the Experts at Vestige to properly manage the discovery process, maintain control over document production and protect the client's IT Dept. It encompasses:

- Identification
- Preservation & Collection
- Processing, Review & Analysis
- Production
- Presentation

OnePass<sup>SM</sup> is a legally defensible, strategically desirable solution that leverages Vestige's legal and technology expertise to lessen our client's burden of recognizing, preparing and responding to legal issues related to the technological aspects of electronic evidence. OnePass<sup>SM</sup> delivers value by placing our client in control of electronic evidence faster than any alternative while insulating our client's business processes from adversaries, all while decreasing the overall total cost of managing the electronic evidence.

***"Vestige's OnePass<sup>SM</sup> Controlled Discovery process helps attorneys discharge their duties under Zubulake, while keeping the producing party in control of their own discovery; thereby neutralizes the advantage that many requesting parties seek when they ask for electronic evidence."***
