

Benefits

- Easy to understand for business leaders.
- Establishes a common vocabulary between management & IT.
- Provides actionable recommendations.
- Allows an organization to prioritize where resources should be deployed.
- Highlights relevant cybersecurity risks including overall governance, policies, procedures as well as technical issues including exploitable vulnerabilities and conditions that lower the organization's overall cybersecurity posture.
- Gives an Overall Grade and focuses on performance within the 5 domains of CyberSecurity: Identify, Protect, Detect, Respond, and Recover.
- Delivers a holistic roadmap of how the organization should focus its CyberSecurity efforts.
