

Danny **Stemple**, BS, CCO, CCPA, ACE CyberSecurity & Digital Forensic Analyst at Vestige

Kenneth "Danny" Stemple, Jr., joined Vestige Digital Investigations in 2018.

As a CyberSecurity Analyst at Vestige he assists contracted organizations with CyberSecurity Readiness, Vulnerability Scanning, External Penetration Testing, Compliance Audits and IT General Control Audits.

Additional Cybersecurity skills include:

- Performing security assessments that include vulnerability scanning and Active Directory/Group Policy review.
- Assisting with vulnerability remediation, firewall configuration, and general network hardening.
- Conducting penetration tests on network infrastructure and web applications using industry standard tools and social engineering.
- Performing active threat monitoring and hunting to discover and mitigate unauthorized access to network devices and resources.

He also is a Forensic Analyst and is responsible for securing, preserving, analyzing and reporting on Electronically Stored Information (ESI) from clients, opposing parties and 3rd party digital devices that have been retained by Vestige.

Danny hails from Parkersburg, WV, where he attended Parkersburg H.S. He received an Associate of Arts degree in Computer Science from West Virginia University. He went on to complete a Bachelor of Science degree in Digital Forensics from Marshall University in WV in 2016.

He currently holds three professional designations:

- Cellebrite Certified Operator (CCO)
- Cellebrite Certified Physical Analyst (CCPA)
- AccessData Certified Examiner (ACE)
